

Exciting new joint venture in Adelaide's southern suburbs

**SOUTHERN WASTE
RESOURCECO**

TOMORROW'S SOLUTIONS. TODAY

It gives us the opportunity to provide a full suite of services to our clients in the southern region

ResourceCo clients in Adelaide's southern suburbs will be able to take advantage of a new full circle service solution with the establishment of Southern Waste ResourceCo.

The facility offers ResourceCo clients packaged solutions, via a complete end of life option after the extraction of all reusable and recyclable materials has been undertaken through ResourceCo's suite of services.

The joint venture, which commenced on August 1, between ResourceCo and the Southern Waste Depot builds on the strong businesses established by both organisations.

"This is a very exciting venture for us," said ResourceCo Managing Director, Simon Brown.

"It gives us the opportunity to provide a full suite of services to our clients in the southern region," he said.

Lucas Earthmovers Chief Executive Officer, Ben Lucas, speaking on behalf of the Southern Waste Depot, said Southern Waste ResourceCo will provide an expanded range of services to industry with the added benefits of ResourceCo's

established recycling business and multiple facilities across Adelaide to Southern Waste's complete disposal option for residual materials and waste's needing treatment.

"It is the major recycling facility in the southern suburbs. It will continue to offer the full range of services including material supply, storage and treatment options to aid site remediation projects, and final disposal for non recyclable waste in its recently completed double lined cell," said Mr Lucas.

"Southern Waste ResourceCo will provide a complete solution for dealing with waste in SA" he said.

The Southern Waste ResourceCo facility is located at the corner of South Road and Tatchilla Road at Maslin Beach. The facility was first opened in 1993 and is a major recycling facility. It also operates general landfill activities and set up the infrastructure for the first lined landfill cell and treatment facility in South Australia and has continued to provide state of the art environmentally responsible disposal options.

"Southern Waste ResourceCo will deliver an efficient and streamlined total solution for all resource recovery, construction materials supply and end of life disposal needs," said Mr Brown.
